

Abstract

The invention relates to a method and a system for providing easy access to an e-mail account, in particular a POP3/SMTP e-mail account, via a mobile communication network (1). According to the invention the method comprises the steps of: providing a mobile terminal (2) having a generic e-mail configuration with at least one default POP3/SMTP server address, setting up a connection to a server (5) identified by the default POP3/SMTP server address via the mobile communication network (1) using a standard POP3/SMTP protocol, in the proxy server (5): evaluating a user identification based on specific information assigned to the user, identifying an user e-mail account assigned to the user identification, setting up a connecting to the identified e-mail account of an e-mail system (8).
